Art Unit: 2833

1. This application has been examined. Claims 1-11 are pending in this application.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 11 is rejected under 35 U.S.C. 102(e) as being anticipated by Chen (USPN 6,672,904).

Chen discloses in figs. 1-3, an electrical connector adapted for use with memory stick (40), smart media (30), multimedia (50), secure digital (50) and XD cards (60), each of which is formed with a respective set of conductive contacts, said electrical connector comprising: a dielectric connector housing (10) having top and bottom walls opposite to each other in a first direction, a rear wall interconnecting said top and bottom walls, and lateral walls opposite to each other in a second direction, interconnecting said top and bottom walls and cooperating with said rear wall and said top and bottom walls so as to confine a card accommodating groove, said dielectric connector housing further having a front open side (14) opposite to said rear wall in a third direction for access into said card accommodating groove, said card accommodating groove being configured with first to fifth card receiving spaces adapted to receive one at a time the memory stick, smart media, multimedia, secure digital and

XD cards respectively therein; and conductive terminal means (21-24) mounted on said dielectric connector housing, extending into said card accommodating groove, and adapted contact electrically the conductive contacts on one of the memory stick, smart media, multimedia, secure digital and XD cards when said one of the memory stick, smart media, multimedia , secure digital and XD cards is inserted into a corresponding one of said first to fifth card receiving spaces through said front open side of said dielectric connector housing.

Allowable Subject Matter

4. Claims 1-10 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach or suggest the specific structure of the card receiving space being configured with first to fifth card receiving spaces, each of which is adapted to receive a corresponding one of first to fifth electronic cards, therein and in combination with other limitations as recited in claim 1.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Xuong M. Chung-Trans whose telephone number is (571) 272-2002. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley can be reached on (571) 272-2800 extension 33.. The fax
